

## Lamps for scientific purposes

### Areas of application

- Comparison standards and calibration lamps
- Measurements in photometry, colorimetry and photophysics
- Calibration for measurement of: luminous intensity, luminous flux
- Calibration for measurement of: black body temperature, color temperature, spectral radiant intensity distribution

### Product family features

- Gas-filled incandescent lamps

## Product family datasheet

---

### Safety advice

Information on safety and handling is available on request or can be found in the leaflet included with the lamp or in the operating instructions.

---

### Application advice

For more detailed application information and graphics please see product datasheet.

---

### References / Links

Test certificates can be provided for some of the relevant parameters. Details can be found on the internet at
